

Announcing Sensei Monitor, the Next-Generation Mac status bar performance monitor

Stockholm - September 9th, 2021 - Cindori releases Sensei 1.5 with a major new status bar monitoring feature.

We are excited to announce the release of **Sensei Monitor**, a brand new way to monitor your Mac performance. Sensei Monitor is a new feature in Sensei that allows you to create and customize panels and status bar items with different widgets. It is the ultimate app for monitoring your Mac performance right from your status bar.

Sensei Monitor has been in development for over a year, and features an advanced statistics engine as well as a stunning design that fits in perfectly with modern versions of macOS. Developed using cutting-edge technology such as SwiftUI, it features an intuitive editor where the user can customize their monitoring using drag and drop.

Sensei Monitor Features

- Modern UI Design, handcrafted for macOS
- Amazing performance, uses less CPU resources than competing apps
- Advanced editor and customization options
- Developed using modern technologies (SwiftUI)

Statistics Highlights

- CPU
- CPU Cores
- GPU
- RAM
- Storage
- Network
- Temperature Sensors
- Fan Speeds
- Battery
- Process usage (CPU / RAM / Energy)

Pricing and Availability

Sensei Monitor is included as a part of Sensei, and existing users will get this new feature for free. See next page for more information.

Requirements

Sensei Monitor requires macOS 11.3 Big Sur or later, while Sensei itself requires macOS 10.15 Catalina. It supports both Intel and Apple Silicon hardware.

About Sensei

Sensei is an app that spans both software and hardware, including many more features than other apps in the Mac optimization category. It includes features for cleaning your disk, uninstalling apps, analyzing battery and disk health, monitoring CPU/GPU/RAM statistics, optimizing boot startup speeds and much more.

Sensei Features

- Performance Dashboard
- Startup Speed Optimizer
- Disk Cleaner
- SSD Trim Enabler
- HDD/SSD S.M.A.R.T Reporter
- Disk Health Analyzer
- Disk Benchmark
- Disk Statistics Monitor
- Partition Map Explorer
- GPU Monitor
- GPU Firmware Exporter
- Detailed GPU/eGPU Reporter
- Battery Health Analyzer
- RAM Monitor
- Thermal Dashboard
- Fan Control (coming later in Q1)
- CPU Monitor
- Temperature Monitor
- App Uninstaller

Pricing and Availability

Sensei is available at <https://sensei.app> for \$29/year (subscription based) or \$59 for a lifetime license. Owners of our previous apps, Trim Enabler or Disk Sensei, are eligible for an upgrade to Sensei at up to a 50% discount at <https://sensei.app/upgrade>.

Requirements

macOS 10.15 Catalina
